4 DANCE

The **BSC 4 DANCE Folding Dance Floor** is a solution that will work perfectly in hotels, restaurants, sports halls, clubs, theatres and during all kinds of dance events.

The floor modules are equipped with a 3M anti-slip system that prevents shifting during use, increasing the safety of people using the floor..

- **The floor module connection system** is based on connecting inserts equipped with the 3M Dual Lock system, which allows for quick, easy and durable connection of its individual elements.
- **The surface of the BSC 4 DANCE** dance floor is a high-quality vinyl panel from the renowned JOKA brand. This panel comes from the JOKA Designboden 555 Wooden Styles collection, which combines the aesthetics of wood with modern technological properties.
- A wide selection of wood-effect decors allows you to create elegant and natural-looking dancing surfaces. Thanks to their high-quality workmanship, the panels are moisture-resistant and easy to maintain. This collection is also environmentally friendly, made from materials from sustainable sources.
- **BSC 4 DANCE flooring is available in 6 shades of classic oak plank:** natural, chalet, cream, blond, nordic and light.
- The possibility of any configuration of panels allows you to adjust the size of the floor to various needs.
- **Transport trolleys** adapted to transport modules enable easy transport of 24 m² of floor, which significantly facilitates movement and installation. The trolley fits through a doorway 90 cm wide. The weight of the trolley with panels and aluminum strips is 340 kg

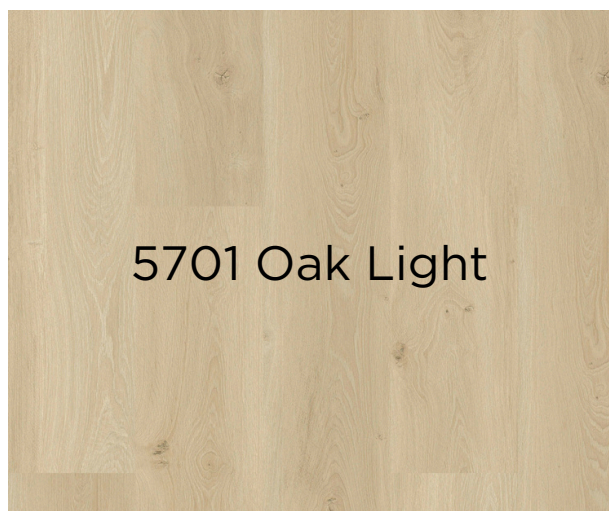

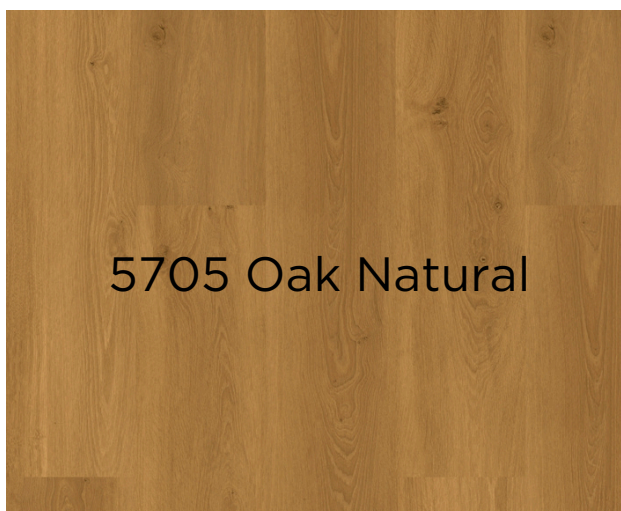

- **Material of structural elements:** ABS plastic.
- **Load capacity:** 1000 kg/m², confirmed by tests and static strength calculations.
- **Usable surface:** vinyl panel from the renowned manufacturer JOKA with a usable class of 23/33/42, ensuring high durability and resistance to wear in various conditions of use. **High abrasion resistance** ensures long-lasting aesthetics and functionality even with intensive use. **Flame retardancy** class Bfl-s1 ensures high resistance to fire.
- **Module connection system:** connecting inserts made of injection moulded plastic, equipped with the 3M DualLock system enabling permanent and stable connection of subsequent modules.
- **Edging:** aluminium finishing strip, modular, enabling the creation of various configurations and flexible adjustment of the floor to various spatial arrangements.
- **Module dimensions:** 0.768 m x 0.768 m, which gives an area of 0.59 m².
- **Module weight:** 6.3 kg.
- **Weight of the trolley** with panels and strips: 340 kg
- **Water resistance:** the floor is fully waterproof, which allows it to be used not only indoors but also outdoors.
- **Operating temperature range:** product designed to operate at temperatures from +10 to +40 degrees Celsius.

4 DANCE

**SC 4 DANCE flooring is available in 6 shades of classic oak plank:
natural, chalet, cream, blond, nordic and light.**
