

PORTABLE ACCESS RAMPS FOR STAGING

The BSC stage platform access ramp is the perfect solution for providing seamless stage access to all participants, including wheelchair users. This specially designed incline eliminates barriers such as stairs, enhancing comfort and accessibility for all kinds of events. The ramp meets the highest standards of safety and functionality, ensuring a secure and user-friendly experience.

MAIN FEATURES

Durable Construction

The ramp is made of lightweight yet highly durable aluminum, resistant to corrosion and suitable for both indoor and outdoor use. Thanks to the use of aluminum alloys, the ramps are strong yet lightweight, and can be set up in less than a minute.

Safety & Comfort

The ramp features a non-slip surface, while additional side guards and handrails on both sides ensure maximum user safety. It is ideal for wheelchair users, whether using manual or electric wheelchairs.

Easy Assembly & Portability

The ramp is foldable and easy to store, offering the flexibility of permanent installation or portable use across various locations. With an intuitive assembly system, it can be set up in less than 30 seconds.

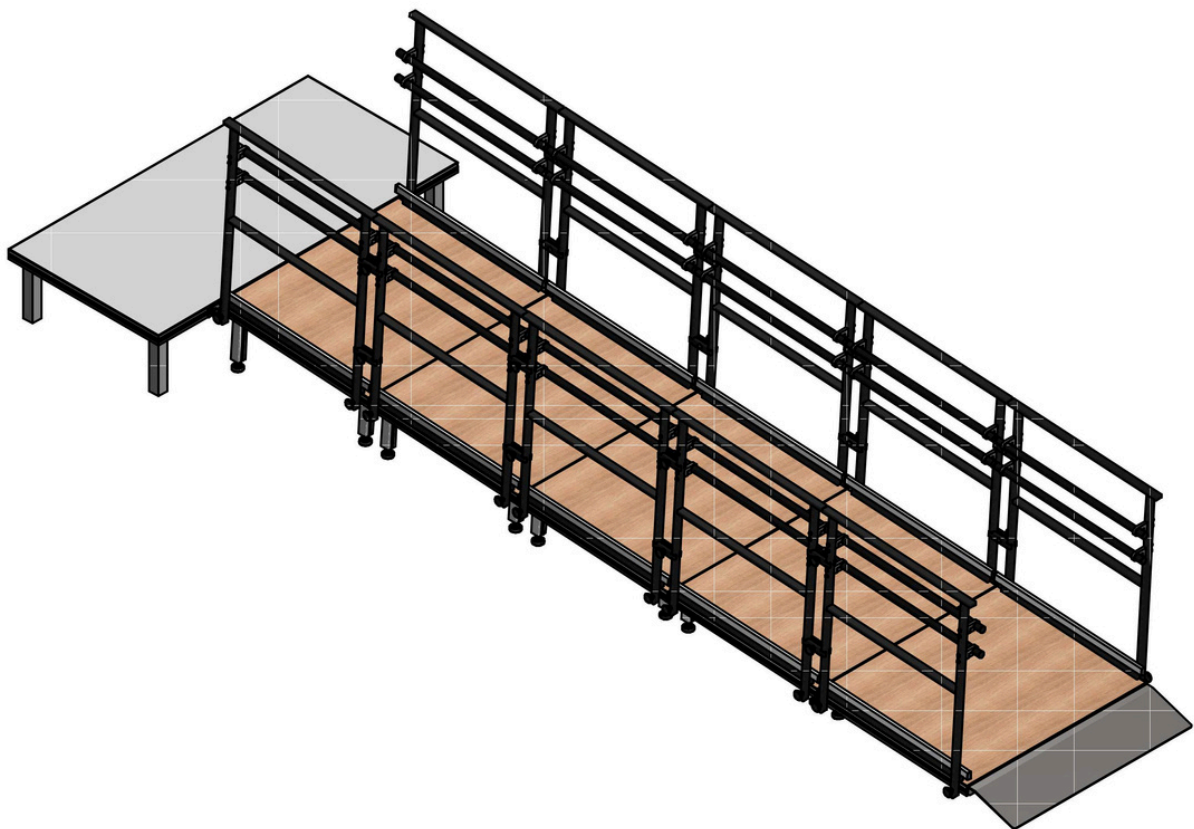

APPLICATION AND BENEFITS

The stage access ramp is an ideal solution for theaters, concert halls, event venues, and schools. It enables wheelchair users to fully participate in events, ensuring seamless access and overcoming height differences—a crucial factor in promoting inclusion and improving quality of life for individuals with disabilities.

Our product range also includes wheelchair access ramps, telescopic inclines, and foldable ramps, all of which can be customized to meet various requirements. With our lightweight aluminum ramps, we provide barrier-free access to different spaces, effectively eliminating obstacles such as thresholds, curbs, and stairs.
